Primary Web Pages

The Media Library Box has three primary Web pages:

Index.html

About.html

Statistics.html

These are located in the directory: LibraryBox/Content and are supplemented by files in the LibraryBox/Content/css, LibraryBox/Content/img and LibraryBox/Content/locales folders

Header Graphics

There are two main header graphics. This is the top navigation bar graphic on the left side and the Welcome graphic. These are both located in the LibraryBox/Content/img folder. The top navigation bar graphic is generally a png file of 33x33 pixels in size or so. The exact size may vary as the aspect size may vary. However, the height should be around 33 pixels. The Welcome graphic is generally a png file of 60 x 60 pixels in size or so. Again the exact size may vary as the aspect ratio may vary. However, the height should be around 60 pixels or roughly twice the size of the top navigation bar graphic.

Folders – text, audio, video, apps, and all content

The primary menu folders for text, audio, video and applications are all located under the directory LibraryBox/Shared. Content that is loaded into these directories will be automatically shown in the directory listing when the top navigation element (text, audio, etc.) are selected. The All Content navigation selection provides a file directory listing of the LibraryBox/Shared directory showing the 4 main folders and any additional subfolders that you may create there (eg: LibraryBox/Shared/text, etc.). Please note that the top header menu is hard coded on the index.html, about.html and statistics.html pages. If you want to change the menu items or subsequent folders these changes must be done in all three html file. Additionally, any language translation changes must be followed in all of the localization files found under the LibraryBox/Content/locales directory. (additional information on localization to different languages can be found farther down this document.)

CSS Style Sheets

The main CSS style sheet will control the overall responsive design including the primary color scheme for the Menu, Header and Footer of the page as well as general background colors etc. Most of the changes needed to adapt the look and feel will be done in the LibraryBox/css/structures.css style sheet:

About Line 20: Top header color

About Line 28: Navigation bar text color

About Line 32: Navigation bar focus color (on mouse over)

About Line 33: Top header focus background color (on mouse over)

About Line 38: Title Text Color

About Line 42: Title Highlight Color

About Line 52: ---

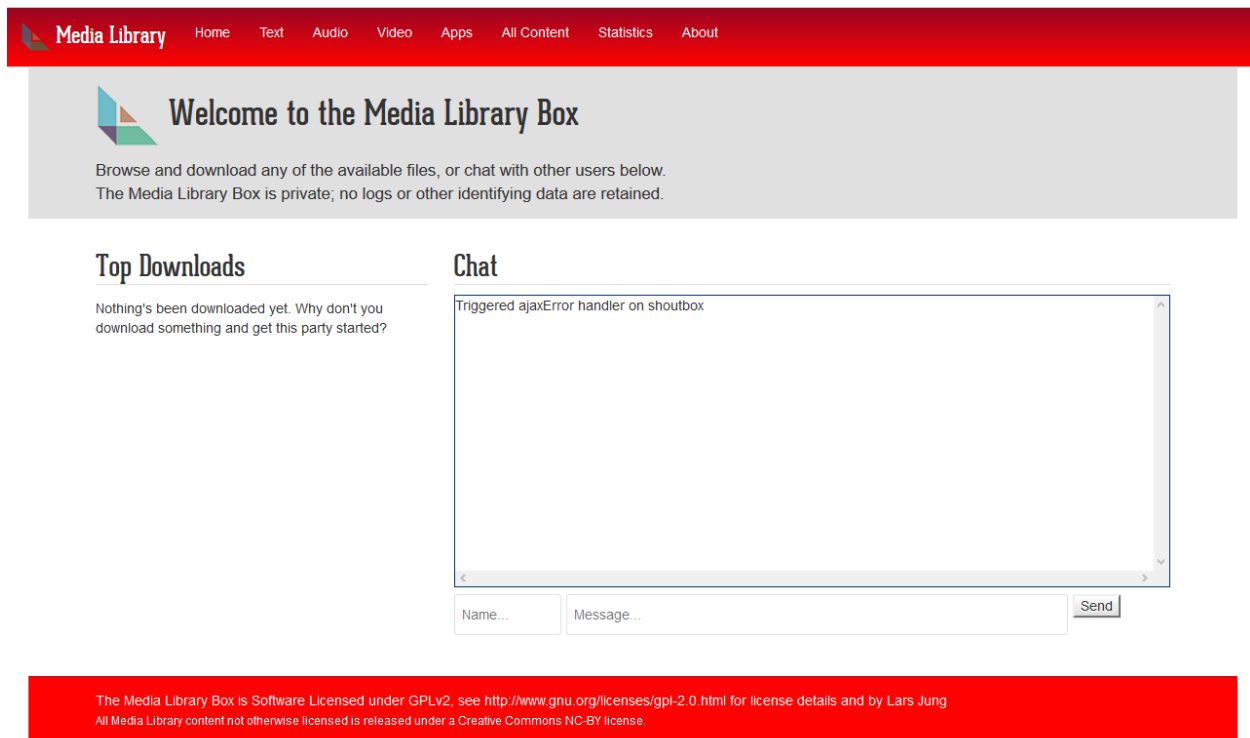

About Line 68: Shoutbox Message Color

About Line 98: ---

About Line 118: Welcome Area background Color

About Line 137 Bottom Footer Color

Index.html

Note that with the above image represents the default Media Library Box look and feel when no browser local (language preference) is matched. This is the base text in the HTML file with the style sheets applied.

Note that the About page and Statistics page will have the same Header/Footer as the Index page. However, the default text for the Header/Footer if changed must be changed in all three HTML files. Only the CSS style is the same between the files (eg: color, font, responsive design, etc.)

A note on language localization: These web pages use the Firefox L10n language localization implementation. This means that when a browser connects to the device, the Local is picked up by the web server from the attached browser. This Local is defined by ISO-639-1/2/3 coding as a preferred 2-character language code, or 3-character language code if 2 is insufficient, or possibly more as defined by ISO-639-2 and ISO-639-3. If there is a loaded 'locale' defined in the web server for the language code of the browser, a character string substitution on the HTML page will be done before it is served to the browser. This provides for the ability to localize the menu and text content of a page to different languages. An incompletely translated Arabic example of the same index page follows:

If the Local of the browser does not match any loaded 'local' definition for the web server it will return the default HTML page without any substitutions.

More discussion on configuration of locals will be done later in this guide.

INDEX.HTML Customization

The following INDEX.HTML line references provide a general idea of where changes need to take place to alter the look/feel of the base page.

About Line 7:	Web browser tab title
About Line 24:	Logo on the top left of the Navigation Bar & Title Text
About Line 26:	Toggle Navigation Bar & Localization (for small screen navigation icon toggle)
About Line 34-41:	Navigation Bar Text & Localization

About Line 55-57:	Welcome Area Title, Text & Localization
About Line 63:	Top Download Text & Localization
About Line 73:	Chat Text & Localization
About Line 77:	Chat Name & Localization
About Line 78:	Chat Message & Localization
About Line 79:	Chat Send Button & Localization
About Line 83-87:	Shoutbox Options & Localization
About Line 98:	Back to Top Footer Text (visible for small screens only) & Localization
About Line 99:	Footer License Text & Localization
About Line 100:	Footer License Other & Localization

STATS.HTML Customization

Stats.html shows the statistics for the Media Library Box. It is linked from the main menu bar as well as from the About.html page

About Line 6:	Browser Tab Title
About Line 23:	Navigation Bar Logo, Title text & Localization
About Line 25:	Toggle Navigation & Localization
About Line 33-40	Navigation Bar Text & Localization
About Line 54:	Welcome area Title, Graphic & Localization
About Line 61:	User Counts & Localization
About Line 62:	Visitor Counts & Localization
About Line 66:	Content Downloads & Localization
About Line 67:	Nothing Downloaded yet text & Localization
About Line 76:	Back to Top Text & Localization (only display's on small screens)
About Line 77:	Footer License Text & Localization
About Line 78:	Footer License Other & Localization

ABOUT.HTML Customization

The about.html page is designed to provide additional information about the unit and organization behind it. It is broken down into multiple parts which include the Welcome area, the Top Header & Text area, the Middle Header & Text area and the Bottom Header & Text area.

Note: that when using localization, only single lines of text without HTML formatting can be used for the Header or Text areas defined above. This limits the look/design which one can do on this page and limits the type of base page format/layout that one uses in about.html

About Line 6:	Browser Tab Title
About Line 22:	Top Left Logo, Title Text & Localization
About Line 24:	Navigation Bar Toggle & Localization
About Line 32-39:	Navigation Bar Home Text & Localization
About Line 54:	Welcome area Logo, header & Localization
About Line 55:	Welcome area text & Localization
About Line 71:	Top area Header Text & Localization
About Line 72:	Top area Text & Localization
About Line 74:	Middle area Header Text & Localization
About Line 75:	Middle area Text & Localization
About Line 82:	Bottom area Header Text & Localization
About Line 84:	Bottom area Text & Localization
About Line 86:	View & Download Visitor Statistics text & Localization
About Line 95:	Back to Top Text & Localization (only visible on small screens)
About Line 96:	Footer Common License Text & Localization
About Line 97:	Footer Common License Other Text & Localization

A Sample of the About page for an organization may look like:

About Media Library

The Media Library Box is designed to enable the distribution of digital information to areas with little or no Internet access, even off the grid. It does so using open source software and very inexpensive hardware, allowing the distribution of digital information at a far lower cost than other solutions.

About OM

Transforming Lives and Communities

For over 50 years, Operation Mobilization (OM) has been bringing the message of hope through Jesus Christ to men, women, and children around the world. Though we have over 3,400 volunteers and staff serving with OM in 118 nations, we have one thing in common — we love Jesus and we want others to have the opportunity to hear about Him.

Through Bible studies, teaching students, building businesses, relief and development work, the creative arts and much, much more — by all means possible, we partner with the local church to tell people how our lives have been changed and how they too can meet Jesus!

We are a collective of 3,400 people who don't fit a mold, who don't sit still, and who love the adventure of serving Jesus. We live in the remote corners of the world and the city-centers. We feed the hungry and heal the sick.

Mission Statement

OM exists to see multiplying fellowships of Christ-followers established among the unreached and forgotten.

OM's role in the body of Christ is to motivate, develop and equip people for world evangelization, and to strengthen and help establish communities of Christ-followers, especially among the unreached in the Middle East, South and Central Asia and Europe.

We do this through Evangelism, Relief & Development, Church Planting, Justice and through Mentoring & Discipleship

Doctrinal Statment

We believe that there is one God, eternally existent in three persons, Father, Son and Holy Spirit.

We believe in the absolute deity and full humanity of our Lord Jesus Christ. We believe in His virgin birth, His sinless life, the authenticity of His miracles, His vicarious and atoning death, His bodily resurrection and His present mediatorial work in heaven.

We believe in the personality and deity of the Holy Spirit. We believe He gives life, He sanctifies, He empowers and comforts all believers.

We believe that the Scriptures, both the Old and New Testaments in their original texts, are fully inspired by the Holy Spirit, without error, and are the final authority for the Church.

We believe that man was originally created sinless. Tempted by Satan, man fell and thereby brought the whole race under the condemnation of eternal separation from God.

We believe that man is saved through repentance and faith in the finished work of Christ. Justification is through grace alone.

We believe that the Church is the body of Jesus Christ composed of all true believers. The present work of the Church is the worship of God, the perfecting of the saints and the evangelization of the world.

We believe in the personal and bodily return of the Lord Jesus Christ to consummate our salvation and establish His glorious Kingdom.

The Media Library Box is Software Licensed under GPLv2, see <http://www.gnu.org/licenses/gpl-2.0.html> for license details and by Lars Jung
All Media Library content not otherwise licensed is released under a Creative Commons NC-BY license.

Localization – Supporting Multiple Languages

Language localization of the Media Library Box is done through code from the Firefox L10n initiative. It uses specific java script to replace HTML segments of text within a page before it is served to the user's browser. The specific language detection uses the Local setting of the user's browser to receive the ISO-639-1 language code (or alternately ISO-632-2 or ISO-639-3 if the language is not specified in the earlier ISO specification). It preferentially uses 2-character language codes (alternately 3 or more-character language codes or regionalization's). If the

received browser language code does not match any defined loaded web server localization file, then the base HTML file is served. If, however, the language code does match a defined loaded web server localization file then the text in the localization file will be replaced in the HTML file before sending it to the user's browser.

Localization files are stored in the LibraryBox/Content/locales directory:

Name	Date modified	Type	Size
 data.de.properties	1/6/2016 11:41 AM	PROPERTIES File	6 KB
 data.en.properties	1/6/2016 11:23 AM	PROPERTIES File	6 KB
 data.es.properties	1/6/2016 11:41 AM	PROPERTIES File	6 KB
 data.fr.properties	1/2/2016 6:17 PM	PROPERTIES File	6 KB
 data.he.properties	1/2/2016 6:17 PM	PROPERTIES File	7 KB
 data.hr.properties	1/2/2016 7:05 PM	PROPERTIES File	6 KB
 data.id.properties	1/2/2016 6:19 PM	PROPERTIES File	6 KB
 data.it.properties	1/2/2016 6:19 PM	PROPERTIES File	6 KB
 data.ko.properties	1/2/2016 6:50 PM	PROPERTIES File	7 KB
 data.nl.properties	1/6/2016 11:30 AM	PROPERTIES File	6 KB
 data.no.properties	1/6/2016 11:30 AM	PROPERTIES File	6 KB
 data.pt-br.properties	1/6/2016 11:30 AM	PROPERTIES File	6 KB
 data.sv.properties	1/2/2016 6:23 PM	PROPERTIES File	6 KB
 data.sw.properties	1/2/2016 7:17 PM	PROPERTIES File	5 KB
 data.zh-cn.properties	1/2/2016 6:27 PM	PROPERTIES File	5 KB
 data.zh-tw.properties	1/2/2016 6:28 PM	PROPERTIES File	5 KB
 locales.ini		Configuration sett...	1 KB

Note that the locale file names are defined by data.(language code).properties and each language file contains a list of substitution variable names followed by the defined string of data to use in the HTML substitution.

The locales.ini file is used by the web server to initialize all of the available local files for each of the languages that it will recognize as available:

```

[en]
@import url(data.en.properties)

[fr]
@import url(data.fr.properties)

[sw]
@import url(data.sw.properties)

[no]
@import url(data.no.properties)

[ko]
@import url(data.ko.properties)

[de]
@import url(data.de.properties)

[it]
@import url(data.it.properties)

[sv]
@import url(data.sv.properties)

[es]
@import url(data.es.properties)

```

Note that the locales.ini file references the language in square brackets followed by the import request for the specific local data file defining the variables & strings for substitution followed by a new line. If new local data files are added they must also be added to the locales.ini file to be loaded by the web server.

The specific local data files for each language are broken down into multiple sections for ease of editing:

- Language Identification comment
- The common navigation bar and footer variables & text substitutions
- The index page variables and text substitutions
- The about page variables and text substitutions
- The stats page variables and text substitutions
- The base directory listing (index) variables and text substitutions

Note that each local data file must contain all of the required variables and text substitutions otherwise the L10n HTML text editing will be incomplete and the original HTML page content will be served.

Note that text substitutions must be contained on a single line without any HTML formatting embedded. This limits the ability to alter the look and formatting but is part of the L10n requirements.
